🌸 Cambridge Care Services

Developer Task Brief

Target: `cambridgecareservices.co.uk` (Next.js) • **Estimated Effort:** ~20 to 30 mins • **Lead Recipient:** `+44 7917 611 425`

Please implement the following two lightweight additions to the Cambridge Care Services website.

Task 1: Embed AI Care Assistant Widget (1 Minute)

> **Action:** Place this 1-line script immediately before the closing `</body>` tag in your root layout (`app/layout.tsx` or main HTML template):

```
<script src="https://cdn.jsdelivr.net/gh/pankajatd/cambridge-care-chatbot@main/widget.js" async></script>
```

Or using the Next.js `<Script>` component in `app/layout.tsx`:

```
import Script from 'next/script';

// Inside RootLayout before closing body:
<Script
  src="https://cdn.jsdelivr.net/gh/pankajatd/cambridge-care-chatbot@main/widget.js"
  strategy="lazyOnload"
/>
```

Task 2: Automated WhatsApp Alert on Form Submission (20 Minutes)

> **Action:** Dispatch an instant WhatsApp alert to the Registered Manager whenever a family submits a care request or assessment booking form.

Step A: Install Dependency

```
npm install twilio
```

Step B: Environment Variables

Add these keys to your `.env.local` and Vercel/hosting dashboard:

```
TWILIO_ACCOUNT_SID=ACxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
TWILIO_AUTH_TOKEN=your_auth_token_here
TWILIO_WHATSAPP_SENDER=whatsapp:+14155238886
CARE_MANAGER_WHATSAPP_NUMBER=whatsapp:+447917611425
```

Step C: Backend API Route Handler

Add this dispatch snippet to your form submission endpoint (e.g. `app/api/contact/route.ts`):

```
import { NextResponse } from 'next/server';
import twilio from 'twilio';

const client = twilio(process.env.TWILIO_ACCOUNT_SID, process.env.TWILIO_AUTH_TOKEN);
const twilioSender = process.env.TWILIO_WHATSAPP_SENDER || 'whatsapp:+14155238886';
const managerPhone = process.env.CARE_MANAGER_WHATSAPP_NUMBER || 'whatsapp:+447917611425';

export async function POST(request: Request) {
  try {
    const data = await request.json();
    const { fullName, phone, email, postcode, careType, schedule, startDate, notes } = data;

    // 1. Compose formatted WhatsApp message
    const alertMessage =
      `🚨 *NEW CARE INQUIRY — Cambridge Care Services*

` +
      `👤 *Contact:* ${fullName || 'Not provided'}
` +
      `📞 *Phone:* ${phone || 'Not provided'}
` +
      `📧 *Email:* ${email || 'Not provided'}
` +
      `📍 *Location:* ${postcode || 'Cambridge / South Cambs'}
` +
      `🩺 *Care Needs:* ${careType || 'General Care'}
` +
      `⏰ *Schedule:* ${schedule || 'Flexible'}
` +
      `🗓️ *Start Date:* ${startDate || 'ASAP'}
` +
      `💬 *Notes:* ${notes || 'None'}

` +
      `👉 *Tap phone number to call family immediately.*`;

    // 2. Dispatch WhatsApp alert via Twilio
    await client.messages.create({
      from: twilioSender,
      to: managerPhone,
      body: alertMessage,
    });

    return NextResponse.json({ success: true, message: 'Inquiry received and notified.' });
  } catch (error: any) {
    console.error('WhatsApp notification error:', error);
    // Return 200 so form submission still succeeds for user even if notification fails
    return NextResponse.json({ success: true, warning: 'Saved without notification' }, { status: 200 });
  }
}
```

Verification & Acceptance Criteria

☐ Floating circular 🌸 button appears in the bottom-right corner of the website.

☐ Clicking the bubble opens the Cambridge Care Assistant window cleanly.

☐ Submitting a test form on the website successfully delivers a formatted WhatsApp alert to `+44 7917 611 425`.
